

Karl's Corner

WE'RE BACK! Did you miss us?

After a brief hiatus this summer, we are back in the saddle and cranking it up, here at CTC! Here it is November and we're just getting the newsletter back in the system. Lot's to catch up on, so let's get going:

Maybe you heard? Tom Schermerhorn.....remember him? He remembers you! Anyway, Tom's back and he's thrilled to be here. The B of D of CTC thought it would be a great idea to have Tom come back as the President and the troops are thrilled. Tom has some things to say elsewhere in the Newsletter so be sure to catch that update.

New EtherNet/IP™ Master and Slave Modules Available for Model 5300

controller

CTC has released the M3-61C EtherNet/IP Master and M3-61D EtherNet/IP Slave Modules for its Model 5300 web enabled automation controllers, enabling users to create master and slave controller units on an industrial Ethernet network. The modules enable the Model 5300 to distribute control within a network environment, as well as interface with other third-party EtherNet/IP products.
